St Anthony of Padua Catholic Primary School

Computing Medium Term Plan – Year 1 – Summer 2 – News Presenter

Lesson	Driving Question	Lesson	Assessment
1	What is news?	In this lesson, the children will discuss what 'news' is and where it can be viewed online and offline. The children will use a device to access and search the internet. Then the children will add a photograph and text to a document to personalise it and answer questions.	I can recognise the ways we use technology in our classroom, my home and community. I can use a search engine.
2	What is a logo?	In this lesson, the children will start creating their news reports. They will start by designing their news report logo using a paint app. They will export, save and import the image into their journal.	I can use technology to create and present my ideas.
3	How can we type on a computer to tell someone our news?	In this lesson, the children will learn basic keyboard skills and type a good news story about themselves. They will learn how to format the text and save their work.	I can organise and store my digital work.
4	How can I use a device to record a news story?	The children will create a short video clip in this lesson by recording their happy news story. You have two options: firstly, the children can use the camera on their device and read out the news story; secondly, if they have access to iPads, they can use ChatterPix and bring a drawing to life when they record their story.	I can take good-quality photographs and videos on an iPad/digital camera.

Lesson	Driving Question	Lesson	Assessment
5	Can you make up a story from just a picture?	In this lesson, the children will practice their inference skills; inference is a tricky reading area. They will do this by examining an image and making a news story. They will draw a presenter using a paint app and a microphone to record their voice.	I can use technology to create and present my ideas.
6	What is data?	In this lesson, the children will learn the word data. With the teacher's support, they will move objects on a screen to sort data.	I can communicate politely via the Internet. I can collect and sort data.
