

VOCABULARY LIST - PREPARING FOR SECONDARY SCIENCE Y6

1. How can we improve observations?

- animalcules
- magnification
- microscope
- observation
- senses
- telescope

2. Acid or alkali?

- acid
- alkali
- indicator
- neutralisation

3. How can we separate colours?

- chromatography
- mixtures
- pigments
- separation
- solubility

4. What can affect photosynthesis?

- carbon dioxide
- chlorophyll
- light intensity
- photosynthesis
- temperature
- water

5. How can we change sound?

- pitch
- sound waves
- vibration
- volume

6. How is energy transformed?

- chemical energy
- electrical energy
- energy change
- movement energy
- stored energy
